

SOUTHEAST & CARIBBEAN DISASTER RESILIENCE PARTNERSHIP

WHO WE ARE

The Southeast and Caribbean Disaster Resilience Partnership (SCDRP) is a coalition of public and private organizations that collectively seeks to strengthen the resilience of communities to mitigate and adapt to the impacts of natural hazards and climate change. SCDRP is the broadest regional collaborative network for professionals in emergency management, climate adaptation, and disaster preparedness, recovery, and resilience in the U.S. Southeast and Caribbean.

WHAT WE DO

Over the past decade, our network has evolved into a cross-sector regional forum for resilience professionals from the public, private, and non-governmental sectors to:

- build relationships and deepen communities' resilience capacity through targeted regional coordination events
- outreach to and engage with government officials and businesses
- support public policy research
- host an annual regional convening

WHAT OUR PARTNERS ARE SAYING

James Murley
Chief Resilience Officer,
Miami-Dade County

“The SCDRP is a key platform because it allows a crucial knowledge exchange of best practices related to the shared resilience and climate issues faced by the Southern Atlantic states and Caribbean. Miami-Dade County values the importance to connect with our SCDRP peers to work together and coordinate innovative solutions to the unique challenges we face together as a region.”

Tancred Miller,
Policy & Planning Chief,
NC Division of Coastal
Management

“The SCDRP is one of the best vehicles we have for building and maintaining public-private collaborations for this essential work in the Southeast United States. Our divisions benefit greatly from the information and sharing of best practices among the dedicated practitioners across the region.”

Julie Shiyou-Woodard,
President & CEO,
Smart Home America

“As disasters increase in frequency and severity, no organization can mitigate the impacts alone. We must collaborate to make a meaningful difference for at-risk communities and streamline our efforts. SCDRP is a force multiplier. They help us foster resiliency and avoid duplicative efforts.”

SOUTHEAST & CARIBBEAN DISASTER RESILIENCE PARTNERSHIP

OUR WHY

SCDRP recognizes that the scale of disasters and climate-related impacts faced in the U.S. Southeast and Caribbean territories and nations require vested interests to protect and transform high-risk communities. Our efforts reflect a deep commitment to collaboration across sectors to strengthen the region's capacity to address common issues resulting from disasters and climate impacts.

JOIN OUR EFFORTS

Membership is crucial to supporting a diverse network of professionals who share resources and best practices about resilience and climate adaptation in the U.S. Southeast and Caribbean.

ROLE OF SCDRP IN DISASTER RESILIENCE

Facilitate
response and
recovery needs

Further robust
policy, hazard
mitigation, and
recovery plans

Share
information, best
practices, and
resources

Explore climate
adaptation
strategies

MAKING A DIFFERENCE BY:

Building state, territory, tribal, and local capacity to advance resilience

Catalyzing positive social, economic, and environmental change in the face of increasing climate risks

Accelerating equitable recovery from disasters
